Be Ready for Back-to-School

Get the fastest wireless connection for all the devices in your home!

Wi-Fi is no longer an optional "extra" for most homes, especially during the school year. It has become a critical component of connectivity. Think about the number of wireless devices being used by your family members including laptops, tablets, and smartphones. You need a wireless connection that is reliable, secure and up to date.

Managed Wi-Fi from Albany Mutual Telephone is your local answer to the challenges of wireless connectivity in your home for back-to-school. Our managed Wi-Fi service is specifically designed to get the most out of your high-speed fiber Internet connection. Our trained technicians install commercial-grade wireless equipment in your home to ensure that you have Wi-Fi where you need it the most and for all of your devices that connect to your wireless network. That means fast speeds, better coverage, and fewer problems when you use Wi-Fi.

Wireless technology is constantly changing. The average wireless router only lasts 2-3 years before it should be upgraded so that it can take advantage of faster internet speeds. Managed Wi-Fi means if there's a problem down the road, we can often look into, diagnose, and fix any Wi-Fi related issues from our office. Plus, we maintain and enhance the service for you, so there are no surprise costs for maintenance, upgrades, or replacements.

Managed Wi-Fi - Only \$6.95/month!!!

***One-time installation fee of \$50 - Waived if you call before September 30th and schedule your installation appointment!**

**If You're Happy
and You Know It,
Write Us a Review!**

At AMTA we're here to help and serve our customers, that's why making our customers happy is our #1 goal!

Write a Facebook Review in 5 Easy Steps:

- 1) Search for "Albany Mutual Telephone" on Facebook
- 2) If on a computer, click on Albany Mutual Telephone's page
- 3) Click the "Reviews" tab
- 4) Select a star rating and write a review
- 5) Click "Done"

Thanks for your business, support and great feedback!

Meet Dan!
Combination Technician

Dan has been with AMTA for over 11 years and loves what he does so much that he hopes to be here another 20! He wears many hats, helping to install, maintain, operate and service our telephone, Internet and digital TV customers. He is an integral part of delivering our technology services. He enjoys what he does here at AMTA and it shows through the exceptional service that he delivers to each and every one of our customers. We are fortunate to have him and his great sense of humor, it keeps our office fun and lighthearted!

Favorite thing about working at AMTA?
The job variety and opportunity my position provides to work outdoors.

What would your closest friends say about you? That I'm cheap. I'm not though. I just don't like to spend money on consumables.

What do you enjoy doing in your free time? Fellowship, camping, fishing, disc golf. Most anything outdoors.

What is something that most people don't know about you? Nothing really. I wear my heart on my sleeve.

What is your favorite show in AMTA's digital TV line-up? Duck Dynasty on the A & E Network.

All about Autumn...

Brain Teaser

A man stands on one side of a river, his dog on the other. The man calls his dog, who immediately crosses the river without getting wet and without using a bridge or a boat. How did the dog do it?

Answer

Name - Please Print

Summer Newsletter Winner: Paul Rushmeyer

Q: Which is the correct to say, "The yolk of the egg is white" or "The yolk of the egg are white?"

A: Egg yolks are yellow.

Until about 1500, Autumn was just called "harvest." The full moon closest to the autumn equinox is known as a harvest moon. Before cities electrified, the bright night, the harvest moon was essential for farmers harvesting their late-year crops.

Fewer hours of sunlight and colder temperatures trigger a chemical change in tree leaves. That's why they can turn different colors. In some areas leaves become so bright they're visible from outer space.

Northern Lights are geomagnetic storms that occur when charged solar particles squeeze through our atmosphere's defenses and collide with gaseous particles in Earth's sky. Thanks to the clear nights this free light show occurs twice as often during the fall.
